

# DEEP WATER TOOLING AS

Tooling and spooling

## Water Tooling Pack™

*A complete plug and play set for any work class ROV to run tools on water.*

The set is specially made by DWT and includes a Safety Hot-Stab which has been developed to minimize downtime and leakage. The hot stab will also auto release if anything would happen to the ROV, which is

key when working with big tools.

We even have a four port version which gives you the opportunity to run conventional hydraulic (oil) tools, without coming on deck.

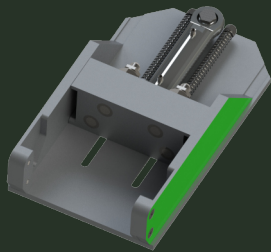

The set includes the DWT Water Valve Pack™, water pump and hoses as well.

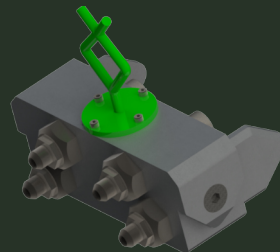

*The Water Tooling Pack accompanying the BAG10 Grab*

*DWT Water Valve Pack™ containing dual water high flow valves.*

*Inboard DWT Hot-Stab™*

*Outboard DWT Hot-Stab™ four port*
